Selected by Orange

Awox solutions have been selected by several companies, among them leaders in consumer electronics and telecommunications.

The Internet Radio is a standard desktop radio capable of playing Internet radio, podcasts, or songs on your PC in addition to traditional FM stations.

It is selected by leader content providers to increase the revenue of their premium music service.

Thanks to its responsive user interface, customers can swiftly browse through thousands of Internet radios or unlimited number of songs located on a networked PC or an USB storage.

Thanks to its Wi-Fi interface, user can easily connect to any Wi-Fi access point.

Custom designs are possible, feel free to contact us about for specific needs.
