The next generation of media applications

AwoX mediaCTRL™ applications provide a complete solution to play, share, and control mobile media with other connected home devices from game consoles to PC and set-top-boxes.

AwoX mediaCTRL™ applications provide guaranteed interoperability with thousands of other DLNA certified home-devices and more.

AwoX mediaCTRL™ already support the leading mobile platforms and chipsets for all advanced DLNA use cases including "Play To". mediaCTRL™ can be customized to your environment ecosystem.

A complete solution for all Connected Home Use cases:

AwoX mediaCTRL™ provide a complete solution to implement all the DLNA and UPnP/AV use cases and guidelines.

> Server : (M-DMS & DMS device classes)

With AwoX mediaCTRL™ mobile, your mobile device can publish and share its content with other connected devices.

User captured HD quality content can be streamed from your mobile phone to your set-top-box.

> Renderer : (DMR device class)

With AwoX mediaCTRL™ mobile, your mobile device can render content shared by other devices in the house, whether these are NAS Network Drives, PCs or PVRs. User can initiate playback from any other control point allowing to receive content pushed from another mobile for instance.

> Controller : (M-DMC & DMC device classes)

With AwoX mediaCTRL™ mobile, your mobile device can start, stop and control media playback on other connected home devices. Your mobile device becomes a remote control to pilot your TV renderer or your friend's mobile.

> DRM Integration :

AwoX mediaCTRL™ Application can include support for all DLNA link protection technology (WM DRM ND, DTCP IP) as well as support for copy protection technology (WM DRM PD).

Guaranteed DLNA interoperability:

AwoX mediaCTRL™ mobile application is based on our DLNA component technology. AwoX mediaCTRL™ has been deployed on mobile phone, home connected devices, set-top-boxes, digital media adapters, PCs and media streamers. With AwoX mediaCTRL™, your mobile device can share its content with microsoft XBOX 360, Sony Playstation 3 or any Windows Media Player 11 or 12 personal computer, etc...
