

## WIRELESS SPEAKER ADAPTER QUARTET

Push your audio content around the house.  
Listen to your favorite songs stored on your home PC.

## Quartet can improve your regular HiFi system by adding all the power and flexibility of WiFi Internet player

QUARTET Receiver works as a slave of your computer or your mobile phone in compliance with DLNA guidelines and Windows 7 NMD specifications.

You can simply discover and control the Wireless speaker to push your music or radio, from your computer or your phone.

Thanks to its Wi-Fi Protected Setup (WPS), user can connect to network by pressing a pairing button on QUARTET and on wireless access point.

Custom designs are possible, feel free to contact us about for specific needs.
